Authorization for this examiner's amendment was given in a telephone interview with Mr. Schiavelli on 6 May 2008.

The application has been amended as follows:

Claim 3 has been canceled and replaced by

---3. Device for receiving PTC elements in a heating device, having an insulating frame having parallel, spaced longitudinal struts and longitudinally spaced crossbars linking the longitudinal struts, and at least one contact plate held in said insulating frame and on which can be placed the PTC elements, longitudinal struts and longitudinally spaced crossbars surrounding recesses for receiving the PTC elements, wherein the contact plate is molded in the frame and, at least in a limited longitudinal portion of the frame, the contact plate is completely and tightly surrounded by the frame.---

Claim 5 has been canceled.

Claim 6 has been canceled and replaced by

---6. Device for receiving PTC elements in a heating device, having an insulating frame having parallel, spaced longitudinal struts and longitudinally spaced crossbars linking the longitudinal struts, and at least one contact plate held in the insulating frame and on which can be placed the PTC elements, wherein the contact plate is frictionally held in the frame so that the contact plate cannot be drawn out of the frame without damaging the frame, and wherein, over most of its length, the contact plate is held in grooves of the frame formed in longitudinal struts, wherein the longitudinal struts and longitudinally spaced crossbars surround recesses for receiving the PTC elements and the longitudinally spaced crossbars are constructed as inwardly directed studs for the positive retention of the PTC elements.---

Claim 29 has been canceled and replaced by

---29. Device for receiving PTC elements in a heating device, having an insulating frame having parallel, spaced longitudinal struts and longitudinally spaced crossbars linking the longitudinal struts, and at least one contact plate held in said insulating frame and on which can be placed the PTC elements, longitudinal struts and longitudinally spaced crossbars surrounding recesses for receiving the PTC elements, wherein the contact plate is molded in the frame and, wherein, over most of its length, the contact plate is held in grooves of the frame formed in longitudinal struts.---

Claim 32 has been canceled.

The following new claim has been added:

Art Unit: 3742

---45. Device according to claim 10, wherein the frame is made from at least one material selected from the group consisting of plastic, polymer ceramic, and molded-on ceramic.---

The following is an examiner's statement of reasons for allowance: the prior art neither discloses nor suggests, in combination with the other limitations in each of the independent claims, an insulating frame having parallel, spaced longitudinal struts and longitudinally spaced crossbars linking the longitudinal struts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
